

Annual Report
July 1, 2001 to June 30, 2002

**Perinatal Programs:
Alcohol & Drug Services**

The Department of Alcohol and Drug Programs' (ADP) Office of Perinatal Substance Abuse (OPSA) oversees a statewide network of approximately 288 publicly funded perinatal alcohol and other drug treatment programs. OPSA was established in 1990 by Assembly Bill 3010 (Spier) to develop a coordinated state strategy to address the substance abuse treatment needs of pregnant and parenting women.

In fiscal year 2001-2002 California allocated \$25,957,000 dollars from the state general fund to perinatal substance abuse programs. Another \$15,554,000 of federal Substance Abuse, Prevention and Treatment Funds were allocated to California's perinatal programs. Perinatal programs that are certified to provide Drug Medical services received an additional \$2,073,941.

The following California Alcohol and Drug Data System data was submitted to ADP as required for all publicly funded providers as well as all licensed Narcotic Treatment Providers.

If you would like more information regarding perinatal substance abuse programs in California, call (916) 323-4445. For information regarding a program near you, call ADP's Resource Center at (800) 444-3066.
